

## **What is Being Possessed? | The Shocking Truth of Possession I Think Before Abortion**

Hi everyone, this is Nancy. Today is Oct. 23rd, 2021. How are you doing? Today I would like to share with you what is being possessed.

A few years ago, when we were walking on one of the streets in San Francisco, there was a man with ragged clothes walking ahead of us. Master told us to pay attention to this man. The man was walking by himself, and at the same time, talking to himself. This is what he was doing. He turned his head to the left to talk, then he turned his head to right to talk. Master said, "There were two beings on his body, and they were talking to each other through this man." In another word, this man was possessed by two beings and his own consciousness was weak.

Possession is very common. Most of the humans are possessed by other beings. The difference is the number and by who. Possession means that the body contains not only your consciousness, but also others'. When your energy is strong, you may not feel that, but when your energy is weak, they dominate you.

My grandmother spent her last few years in bed. She lost her mobility in a stroke. She couldn't recognize many people including my mother who she lived with. She scolded people and cried. She was not the kind grandmother anymore.

There are too many possession examples. Possession phenomenon is very common everywhere on the earth. In some countries and areas, it is more severe. People with deep samadhi power can see the beings in the body. Most times, the possessing beings are this person's creditors, or certain animals, or ghosts, or demons... They exist in various forms.

I just watched a video the other day. In the video an aborted fetus possessed the daughter of a couple, and he spoke through their daughter. He talked about his hatred toward the couple who were supposed to be his parents. He talked about why he chose to be the couple's child. He said he came to repay gratitude because the mother saved his life in the previous life when he was an animal. But after he was aborted, his gratitude changed to hatred toward her. He talked about why there are so many children in the world not listening to their parents. The reason is the aborted fetuses. They are behind in the invisible world with deep hatred and resentment. They are interfering the relationship of the family. He asked the couple to repent in front of the Buddha and make vows to take the Bodhi way, and only by doing that could his hatred be dissolved. It was a long video, and the couple did repent and make vows to practice and protect the proper Dharma. The aborted fetus's hatred was relieved at the end. He removed his hatred, and became free.

We live in the world of cause and effect. When we hurt other beings, we have to repay them; when we help others, others help us.

If one steps on an ant and the ant dies, it is reasonable for the ant to live in this person's body to get energy. You take my body and I live in yours. This is the Law. An ant is small, and its energy is weak, so you may not feel it.

If one shoots a fox, the fox may not only live in this person's body, but also bring bad luck to everything this person does, his job, his family... because different animals carry different character and fox tends to have a strong mind of hatred and retaliation.

As I said in one of the previous videos, if a mother aborted a fetus, she tends to have a long time of depression. Not only that, the family may also lose harmony, and the mother may get this or that kind of illness. All these are from the aborted fetus, the hatred and resentment of the fetus.

Amitabha! This is today's Dharma share. We just lightly touched upon possession. The invisible and the visible world are ONE. The invisible affects the visible, or you may say that the invisible dominates the visible. Behind everyone, there are invisible beings. In the gambling room, there are countless ghosts who are addicted by gambling. They are on the people who are gambling. For the people, who are addicted to sexual conduct, there are

also ghosts who have the same addiction with them. Beings with the same habits attract each other or like each other because they share the same karma. We will continue this possession topic next time. Thank you everyone for being here. I will see you next time. Bye.
